EXPERIENCE

Software Engineer

AKKODIS

July 2025 – Present

Casablanca

- Developed and improved features on a cloud-based PLM/PIM/DAM platform used by international brands.
- Designed business workflows and implemented business rules based on client requirements.
- Analyzed and resolved technical issues impacting performance, data flows, and user experience.
- Optimized backend processes and contributed to high-quality deliverables with QA and Product teams.
- Participated in Agile/Scrum ceremonies and created technical and functional documentation.

Software Developer

CEGEDIM Services Maroc

July 2023 – June 2025

Agadir

- Developed frontend applications using Vue.js and backend services using NestJS.
- Led development workflow and code quality on a major internal project.
- Built responsive, high-performance UI components with Vue.js.
- Created scalable RESTful APIs with NestJS, including authentication and authorization via Keycloak.

PROJECTS

Personal Portfolio

- Developed a personal portfolio website using Nuxt.js.
- Planned integration of a blog section with content management.
- Focused on responsive design, SEO, and SSR rendering.

Marhaba Delivery App

- Developed a delivery application using React.js and Express.js.
- Implemented user authentication and order management workflows.
